SUMMARY

Aspiring Machine Learning Engineer and Data Science enthusiast with hands-on experience building end-to-end AI solutions using Python and modern machine learning techniques. Published IEEE research on PM2.5 prediction and AQI classification, with experience in predictive analytics, data preprocessing, and model development. Passionate about leveraging AI and data-driven solutions to solve real-world problems.

EDUCATION

Indira Gandhi Delhi Technical University for Women <i>B.Tech in Computer Science & Engineering with specialisation in Artificial Intelligence</i>	Aug 2024 – Jun 2028 CGPA: 9.15/10
Rajkiya Pratibha Vikas Vidyalaya, Delhi <i>Class XII (CBSE)</i>	2022 – 2023 87%
Rajkiya Pratibha Vikas Vidyalaya, Delhi <i>Class X (CBSE)</i>	2020 – 2021 94.8%

TECHNICAL SKILLS

Languages:	Python, C++, C, R, SQL
Machine Learning:	Scikit-learn, XGBoost, LightGBM, CatBoost, NLP, Regression, Classification, Ensemble Learning
Data Science:	Data Cleaning, EDA, Feature Engineering, Statistical Analysis, Model Evaluation, Data Visualization
Tools:	Git, GitHub, VS Code, Streamlit, Tableau, Kaggle, Google Colab, Figma

EXPERIENCE

JPMorgan Chase & Co. – Quantitative Research Virtual Experience <i>Forage Remote</i>	jun 2026
- Completed a quantitative research simulation involving financial data analysis, commodity price forecasting, predictive modeling, and trading strategy evaluation. - Applied Python, Pandas, NumPy, exploratory data analysis (EDA), statistical analysis, and data visualization to solve real-world quantitative finance problems.	
Summer Internship – Python & Machine Learning <i>Anveshan Foundation, IGDТУW</i>	Jun 2025 – Jul 2025
- Gained hands-on experience in Python and machine learning through real-world air quality prediction and classification tasks. - Applied data preprocessing, exploratory data analysis, feature engineering, and model evaluation using Python, Pandas, NumPy, and Scikit-learn.	

PROJECTS

Air Quality Prediction using Ensemble Machine Learning <i>Python • LightGBM • XGBoost • CatBoost • Scikit-learn • Pandas</i>
- Built an end-to-end machine learning pipeline using CPCB air quality data from 10 Indian cities for PM2.5 prediction and AQI classification. - Developed ensemble regression and classification models using LightGBM, XGBoost, and CatBoost, achieving $R^2 = 0.8649$ and 83.15% classification accuracy.
AI-Powered Phishing Email and Text Classifier <i>Python • Scikit-learn • NLP • TF-IDF • Pandas</i>
- Developed an end-to-end NLP pipeline to classify over 18,000 emails as phishing or legitimate using supervised machine learning. - Built a TF-IDF feature extraction pipeline with automated preprocessing, achieving 99.6% ROC-AUC on the test dataset.

RESEARCH & PUBLICATIONS

PM2.5 Prediction and AQI Classification using Ensemble Machine Learning	IEEE ICAECT 2026
- Published a peer-reviewed research paper in the IEEE International Conference on Advances in Electrical, Computing, Communication and Sustainable Technologies (ICAECT 2026). - DOI: 10.1109/ICAECT68478.2026.11425951	

ACHIEVEMENTS

- Siemens Scholar (Batch XII)** – Awarded a merit-based scholarship for academic excellence and leadership potential.
- Katalyst Scholar** – Selected for a scholarship program focused on industry exposure, career readiness, and professional mentoring.

HACKATHONS

- GenAI Exchange Hackathon – BEACON** – Built an AI-powered platform for real-time misinformation and phishing detection.
- InnoVertex 3.0 (Finalist)** – Developed a blockchain-based peer learning and token reward platform.
- Thrizl – Build to Bond (Finalist)** – Designed a prototype dating platform with progressive interaction unlocking.
- College Unite Ideathon** – Developed a centralized campus communication and availability platform.
