SUMMARY

Computer Science undergraduate specializing in Artificial Intelligence with hands-on experience in Machine Learning, Data Analysis, and Predictive Modeling. Skilled in Python, SQL, NLP, and modern AI/ML frameworks with experience building end-to-end machine learning pipelines, conducting exploratory data analysis, and developing real-world AI solutions. Strong foundation in statistics, feature engineering, model evaluation, and problem-solving with a passion for leveraging AI to solve impactful business and societal challenges.

SKILLS

Programming: Python, C++, C, R

Data Analysis: Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis

Machine Learning: Scikit-learn, TensorFlow, Natural Language Processing (NLP), Classification, Regression, Ensemble Learning, Feature Engineering, Model Evaluation

Tools: Git, GitHub, VS Code, Google Colab, Tableau, Kaggle, Canva, Figma

Coursework: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems, cloud computing

PROJECTS

A Dual-Model Machine Learning Framework for PM2.5 Prediction and Air Quality Classification 07 2025

- Designed an ensemble-based ML pipeline for PM2.5 prediction and classify AQI categories using CPCB data from 10 Indian cities.
- Developed a Voting Ensemble Classifier (XGBoost, LightGBM, CatBoost) achieving 83.15% accuracy and 0.83 weighted F1-score.
- Implemented a LightGBM Regressor achieving $R^2 = 0.8649$ with RMSE = 21.97 for pollutant forecasting.

AI-Powered Phishing Email and Text Classifier 10 2025

- Developed an end-to-end NLP pipeline to classify 18,000+ emails as Safe or Phishing with 99.6% ROC-AUC
- Built a custom scikit-learn pipeline for automated preprocessing, feature extraction, and real-time prediction.
- Applied TF-IDF vectorization to extract 50,000+ features for high-precision classification.

INTERNSHIP EXPERIENCE

Summer Internship – Python & Machine Learning 06 2025 – 07 2025

Anveshan Foundation, IGDTUW

- Trained in Python programming and core machine learning concepts with hands-on practice.
- Developed a dual-model machine learning framework for PM2.5 prediction and AQI classification using CPCB data from 10 Indian cities, achieving 83.15% classification accuracy and R^2 of 0.86.

CERTIFICATES AND AWARDS

- Research Paper Published** – IEEE International Conference (ICAECT 2026) doi: ieeexplore.ieee.org/document/11425951
- Siemens Scholarship (Batch 12)** Merit-based scholarship awarded for academic excellence and leadership potential.
- Katalyst Scholar** a scholarship program focused on industry exposure, career readiness, and professional mentoring.

HACKATHON

- Gen AI Exchange Hackathon – BEACON** is an AI-powered platform that detects misinformation and phishing in real time while educating users by explaining why content is misleading.
- Hackathon Finalist – InnoVertex 3.0** Developed a blockchain-based E2L platform for peer learning and token-based rewards.
- Thrizll – Build to Bond Hackathon (Finalist)** Designed a prototype dating platform with progressive interaction unlocking based on user engagement levels.
- Ideathon – College Unite** Developed a centralized platform connecting students, faculty, and administration with real-time availability and information sharing.

EDUCATION

Bachelor of Technology (GPA: 9.13) 08 2024 – 06 2028

Indira Gandhi Delhi Technical University for Women

Computer Science and Engineering with Specialization in Artificial Intelligence

Class XII (CBSE) – (Percentage- 87%) Rajkiya Pratibha Vikas Vidyalaya, Delhi 2022 – 2023

Class X (CBSE) – (Percentage- 94.8%) Rajkiya Pratibha Vikas Vidyalaya, Delhi 2020 – 2021
