EDUCATION

Indira Gandhi Delhi Technical University for Women B.Tech in Computer Science & Engineering with Specialisation in Artificial Intelligence, CGPA: 9.15/10	Aug 2024 – Jun 2028
Rajkiya Pratibha Vikas Vidyalaya, Delhi Class XII (CBSE), 87%	2022 – 2023
Rajkiya Pratibha Vikas Vidyalaya, Delhi Class X (CBSE), 94.8%	2020 – 2021

TECHNICAL SKILLS

Languages:	Python, C++, C, R, SQL
Machine Learning:	Scikit-learn, XGBoost, LightGBM, CatBoost, NLP, Regression, Classification, Ensemble Learning
Data Science:	Data Cleaning, EDA, Feature Engineering, Statistical Analysis, Model Evaluation, Data Visualization
Tools:	Git, GitHub, VS Code, Streamlit, Tableau, Kaggle, Google Colab, Figma

EXPERIENCE

Data Analyst Intern <i>Axlero Solutions</i>	Aug 2026 – Present
- Analyzed, cleaned, and validated datasets using SQL and Excel to support business reporting and data-driven decision-making. - Developed SQL queries, dashboards, and data visualizations while collaborating on real-world analytics projects.	
AI for Sustainability Virtual Intern <i>1M1B × AICTE (National Internship Portal) × IBM SkillsBuild</i>	Jul 2026 – Aug 2026
- Developing industry-relevant AI skills through hands-on learning in AI/ML, LLMs, IBM Granite models, RAG frameworks, and agentic AI systems with IBM Labs. - Exploring the application of AI to climate and sustainability challenges, including clean energy, waste reduction, biodiversity, and sustainable cities.	

PROJECTS

Air Quality Prediction using Ensemble Machine Learning <i>Python • LightGBM • XGBoost • CatBoost • Scikit-learn • Pandas</i>
- Built an end-to-end machine learning pipeline using CPCB air quality data from 10 Indian cities for PM2.5 prediction and AQI classification. - Developed ensemble regression and classification models using LightGBM, XGBoost, and CatBoost, achieving $R^2 = 0.8649$ and 83.15% classification accuracy.
Supply Prescript <i>Python • Machine Learning • Streamlit</i>
- Developed an AI-powered supply chain solution to analyze demand patterns and support data-driven inventory and supply planning. - Applied machine learning and data analytics to generate actionable insights for improving supply forecasting and decision-making.
LetsPool <i>Next.js • TypeScript • Tailwind CSS • Supabase</i>
- Developed a carpooling platform connecting users for shared rides with features including gender preferences, seat requirements, and user trust mechanisms. - Built the responsive web application using Next.js, TypeScript, and Tailwind CSS with Supabase integration for authentication and user data.

RESEARCH & CERTIFICATIONS

PM2.5 Prediction and AQI Classification using Ensemble Machine Learning IEEE ICAECT 2026 – Published peer-reviewed research on PM2.5 prediction and AQI classification using ensemble machine learning. DOI: 10.1109/ICAECT68478.2026.11425951
JPMorgan Chase & Co. – Quantitative Research Virtual Experience Forage Jun 2026 – Completed practical tasks involving financial data analysis, commodity price modeling, and credit risk analysis.

ACHIEVEMENTS

- Siemens Scholar (Batch XII)** – Selected among 310 students from 10,000+ applicants for a merit-based scholarship focused on professional development, leadership, and industry-oriented skills.
- Katalyst Scholar** – Selected for a scholarship program providing industry exposure, career readiness, mentoring, and professional development opportunities.
- McKinsey Forward Program** – Selected participant in a global program focused on professional skills, leadership, and career development.

HACKATHONS

- GenAI Exchange Hackathon – BEACON** – Built an AI-powered platform for real-time misinformation and phishing detection using NLP and machine learning.
- InnoVertex 3.0 – Finalist** – Developed a blockchain-based peer-learning platform with token-based rewards and student engagement features.
- Thrizl – Build to Bond – Finalist** – Designed a prototype dating platform featuring progressive interaction unlocking to enhance user engagement.
